PROFESSIONAL SUMMARY

Performance-driven Electronics Service Engineer with 2+ years of industrial experience in on-site equipment commissioning, instrument calibration, and root-cause troubleshooting across high-speed manufacturing environments. Consistently attained a 90%+ First-Time-Fix rate and reduced unplanned machinery downtime by 22% by applying predictive maintenance workflows, component-level fault isolation, and standardized Field Service Reports. Skilled in diagnosing Programmable Logic Controllers, Variable Frequency Drives, and sensor instrumentation while enforcing total compliance with Lockout-Tagout protocols and plant electrical safety standards.

CORE COMPETENCIES

- Field Operations:** Equipment Installation, Commissioning, Preventive Maintenance, Breakdown Servicing, Calibration, Root Cause Analysis, Site Acceptance Testing
- Industrial Systems:** Control Panels, Programmable Logic Controllers, Variable Frequency Drives, Relay Logic, Actuators, Sensor Interfaces, Microcontrollers
- Diagnostic Tools:** Digital Storage Oscilloscopes, Digital Multimeters, Loop Calibrators, Insulation Resistance Testers, Soldering Workstations
- Documentation & Safety:** Field Service Reports, Standard Operating Procedures, Lockout-Tagout, Plant Electrical Safety, Environmental Health and Safety
- Software Tools:** AutoCAD Electrical, Microsoft Project, Microsoft Excel Data Logging, Circuit Simulation

PROFESSIONAL EXPERIENCE

Renuka Precision Plastics Pvt. Ltd. Hyderabad, Telangana
Service and Maintenance Engineer (Industrial Electronics) Sep 2024 – Present

- On-Site Commissioning:** Directed installation, wiring verification, and commissioning for automated machinery, cutting integration lead time by 15%.
- Fault Diagnostics:** Executed component-level troubleshooting on control panels and drive interfaces, lowering MTTR by 25% with an 88%+ First-Time-Fix rate.
- Instrument Calibration:** Calibrated industrial temperature controllers and pressure transducers against certified benchmarks, eliminating measurement drift.
- Field Documentation:** Authored 120+ structured Field Service Reports, root-cause analysis summaries, and diagnostic logs for operations management.
- Safety Compliance:** Enforced Lockout-Tagout protocols and completed routine high-voltage inspections, delivering zero safety incidents across all shifts.
- Inventory Optimization:** Supervised critical electronic spare parts inventory, cutting component replacement delays by 18% via automated reorder points.
- Technical Mentorship:** Conducted hands-on troubleshooting and safety workshops for 8 junior technicians, decreasing operator-error tickets by 30%.

TECHNICAL PROJECTS

IoT-Based Smart Traffic Regulation and Telemetry System Sep 2023 – Mar 2024
Embedded Systems Project

- System Design:** Engineered an automated traffic management prototype integrating optical sensor arrays with an ESP32 microcontroller to balance traffic density.
- Telemetry Integration:** Deployed wireless communication modules to stream live diagnostic metrics to a central monitoring terminal with 99.2% signal reliability.
- Testing and Validation:** Conducted simulated circuit stress tests and sensor calibration, successfully cutting simulated peak congestion delays by 35%.

EDUCATION

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering Aug 2020 – Jun 2024
Jawaharlal Nehru Technological University Hyderabad, Telangana
Key Modules: Industrial Automation, Control Systems, Microcontrollers, Electrical Instrumentation

ADDITIONAL INFORMATION

- Key Strengths:** Vendor Coordination, Cross-Functional Team Leadership, Client Relationship Management
- Languages:** English (Professional), Telugu (Native), Hindi (Conversational)
